Brain Awareness Week

“What's Going On In There?”

How Enrichment Activities Create Better Brains

The Urban Child Institute 600 Jefferson Ave.

Thursday, March 16, 6:30 – 8:30 pm

This program for the general public will feature two presentations on the development of the brain and how enrichment activities nurture better brains. Dr. Lise Eliot, of the Rosalind Franklin University of Medicine and Science in Chicago, Ill will discuss “What’s Going on in There? Brain Development and Early Learning” and Dr. Richard Smeyne, of St. Jude Children’s Research

Hospital, will speak on “How Environmental Stimulation Creates Better Brains.” Dr. William E. Armstrong, Co-Director of the University of Tennessee Neuroscience Institute, will moderate the program.

This program is directed toward childcare providers, teachers, allied health professionals, and parents. Professional training hours (CEUs) will be provided by the UT Neuroscience Institute. For more information, contact Dr. Paul Herron, UT Neuroscience Institute (448-5824). Space is limited. Please pre-register with Ms. Brenda Williams, First Years Institute (526-1822; williabr@lebonheur.org). Attendance is free.

Refreshments from 5:30-6:30 pm
